

```
[1125... family_count = df["family"].value_counts()
family_count_df = family_count.reset_index()
family_count_df.columns = ["family", "count"]
family_count_barh = family_count_df.plot(kind="barh", x="family", y="count", legend=False)
family_count_barh.set(ylabel="Family", xlabel="Count", title="Count of Cheeses by Family")
family_count_barh
```

```
[1125... <Axes: title={'center': 'Count of Cheeses by Family'}, xlabel='Count', ylabel='Family'>
```

I suppose mold comes in all different flavors, at least it seems so with all these blue cheeses!
